

Larry Saben

Mr. Saben is a Senior Supervising Engineer managing the transportation planning practice for PB's South-east District Office in Atlanta. He has a combined total of over 25 years of planning experience with regional and state government and 12 years as a private consultant. He has led major projects for clients at the federal, state and local levels of government in travel demand model development, and highway, public transit, commuter rail and multimodal studies. Prior to joining PB he was the Vice President in charge of the transportation planning and modeling practice at COMSIS Corporation. He has led major projects for clients at the state and local levels of government in travel demand model development and highway, public transit, commuter rail and multimodal studies. He also has done extensive professional training in transportation planning. Before his consulting experience Mr. Saben was a senior manager with the Maryland Department of Transportation.
